

Letter of Recommendation

I am writing this letter in support of Ms. Nikhitha Peethambara (Emp ID: 616494) who is applying to the Master in Science program at your esteemed University. As her Manager, I have had numerous opportunities to interact with and observe her in the past two years. I find Nikhitha to be a talented software engineer. I would like to offer evaluation of her potential for your consideration.

Nikhitha brings energy, enthusiasm, and commitment in all the activities she does. This is to be expected in any successful member of an entrepreneurial organization, and in this regard, she fits in well. She consistently delivers high-quality software for our organization. This speaks to her overall intellect and ability to learn, attributes that will serve her well in her graduate study.

When she joined our project, depending upon the requirement she was trained on SAP UI5/Fiori for about 3 months. SAP Fiori is a modern User Experience Product which is owned by SAP and it is used to build SAP applications. She was quick at grasping new topics and SAP was completely new to her. With her strong background in Programming, training her was easy.

While Nikhitha is a relatively junior member of our organization as measured by tenure, she quickly established herself as a go-to person in the product domains in which she has worked. In her work, she has shown herself to be a very bright and diligent young software engineer, one who is able to take hold of new concepts quickly. Her performance is brilliant in all the assignments designated to her. Her most remarkable quality is the dedication she shows in whatever she does.

Nikhitha is a valued member of our organization on whom we can rely on, regardless of the difficulty of the task to handle or the novelty of the challenge. Considering her potential, talent and eagerness to learn, I feel that she is the right candidate to pursue higher studies in computer science. I strongly support her application for admission to your University. I wish her success in her future endeavors. In case of any query or confirmation feel free to contact me any time.

LETTER OF RECOMMENDATION

It gives me immense pleasure to write a letter of recommendation for Ms. Nikhitha. I first became acquainted with her in the fifth semester of her undergraduate study at Acharya Institute of Technology. The one and a half years span of my association with her gave me a chance to pay attention to her qualities and capabilities. She is a brilliant student with exceptional diligence and perception. Her quick grasping of new theories, discernment of concepts and keen interest for learning makes her a deserving candidate for the Master's program in Computer Sciences at your University.

I had the opportunity to teach her "System software & Administration" during 5th semester and "Operations Research" in the 6th semester of the course. Nikhitha came across as a confident person with excellent logical and intuitive thinking. She always ranked in the top 10 hardworking students in the class of 60, always securing excellent grades. Her systematic and effective approach to analyze and design algorithms, computation of graphs and profound knowledge of complexity calculation and minimization is remarkable. She has the most interest in programming. She has had substantial exposure to the practical aspects of these subjects through active participation in the laboratory activities and assignments. Her proficiency in the mentioned subjects has made her thinking more constructive and adept and has allowed her to put the knowledge to optimum use. Her careful attention to detail, creative problem-solving and remarkable scholastic ability particularly emphasize her outstanding potential to undertake higher studies.

Nikhitha also has interests outside of academics. She actively took part in "Acharya Habba", the annual fest of the college, from managing and organizing events to participating in them. She is an honest, trustworthy and open-minded individual. Her multidimensional personality and ability to efficiently handle every responsibility given to her branch out her versatility even more. She has skills that she is eager to share, just as she is eager to learn. I am confident that her focus and determination will make her extremely successful in her future endeavors.

Nikhitha has the required academic ability and technical acumen to embark upon a graduate program. Further grooming would make her a prominent professional. I highly recommend her for further education at your esteemed University.
